***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

2. Claims 1-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Bieser et al.

Bieser et al. discloses a tile formed of a composition mixture of about 36 to 64% polyethylene and about 36 to 64% crushed limestone, col. 8, lines 8-45. The tile being less than an inch thick and between about 3-12 inches wide and between about 6-24 inches long, col. 11, lines 50-52.

3. Claims 1-5 are rejected under 35 U.S.C. 102(a) as being anticipated by Wells et al.

Wells et al. discloses a tile formed of a composition mixture of about 36 to 64% polyethylene and about 36 to 64% crushed limestone, col. 6, line 38 to col. 7, line 10. The tile being between about 3-12 inches wide. col. 6, lines 27-29.

Art Unit: 3635

4. Claims 1-5 are rejected under 35 U.S.C. 102(a) as being anticipated by Wells. Wells discloses a tile formed of a composition mixture of about 36 to 64% polyethylene and about 36 to 64% crushed limestone, col. 7, lines 35-60 and claim 13.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over either of Wells et al. or Wells in view of Thompson et al.

Thompson et al. discloses formation of polymeric tiles having a dimension of between about 3-12 inches wide and between about 6-24 inches long, col. 5, lines 23-26. To have formed the tiles of either of Wells et al. or Wells with a dimension of less than an inch thick and between about 3-12 inches wide and between about 6-24 inches long, thus creating a tile presenting an aesthetically pleasing appearance, would have constituted an obvious expedient to one of ordinary skill in the art as taught by Thompson et al.
